

# ENVIRONMENT POLICY

---

The Concessionária dos Aeroportos da Amazônia, in accordance with VINCI Airports Environmental Guidelines and Strategies, undertakes to:

- Seek environmental, social and economic sustainability, ensuring quality, productivity and competitiveness in the market, acting in the responsible management of environmental aspects and impacts inherent to nature and the scale of its activities;
- Promote sustainable development, acting in the protection of the environment through the prevention of all types of pollution and having environmental objectives as guidelines;
- Develop and implement an Environmental Management System, in order to seek continuous improvement of its environmental performance through management models and periodic evaluation of results, identifying best practices and communicating environmental performance to stakeholders;
- Manage and comply with legal and other requirements applicable to its activities and VINCI Airports' environmental guidelines;
- In compliance with the Airport Carbon Accreditation requirements, carry out the mapping and reduction of absolute greenhouse gas emissions, meeting the requirements for obtaining and maintaining the Airport Carbon Accreditation Certification.

To achieve these results, the high direction of Concessionária dos Aeroportos da Amazônia reaffirms its commitment to apply this Policy, defining Environmental Objectives and Goals in coherence with the environmental aspects of the Airport and encouraging all its employees and people who work on its behalf to contribute to its implementation.
